BIO

Mark Goddard is a shamanic healer and Shamandala - shamanic mandala - artist. For decades, he was disconnected from his own purpose, an artist in theory, with an art degree, but not really doing it! - Until his own spiritual journey led him to not only passionately reconnect with his ART, but to INTEGRATE it with HEALING and SHAMANISM. Today, Mark helps people break free from their challenges by identifying & shifting the energetic traces and root causes. Mark specializes in 3 things: Grounding, dramatic shamanic releasing work best described as psychic surgery, and sacred art.

People feel an immediate change in their vitality, happiness and often manifest major shifts, moving forward with aliveness and focus in their relationships, abundance, purpose, health and vibrancy. Mark brings Reiki and Money Reiki into his healing work, sacred retreats and art. People call his paintings VISUAL MEDICINE because they are imbued with the spirit of nature, and the nature of spirit... Mark's mission is to help millions of people connect more with the Earth and with themselves in ways that empower, energize and enlighten them.
